New Delhi: Stressed power assets resolved in the last 18 months are unable to generate adequate cash as the pandemic has reduced demand and made debt servicing difficult, leaving lenders worried about resolution of more such projects with an outstanding debt of ₹50,000 crore.

The turnaround time of these projects has increased because of the pandemic, raising concerns on fresh investments in the sector amid global focus on renewable energy sources, say lenders and government interventions have been able to resolve 14 of the 34 identified stressed plants in the last one and half years. However, at least a dozen more coal-based projects with about 17,000 MW capacity are under various stages of resolution.

While the total outstanding debt of the 34 stressed power plants is to the tune of ₹1.9 lakh crore, the debt of these 17,000 MW is about ₹50,000 crore. The debt exposure of the projects that have been resolved is approximately ₹70,000 crore.

A recent evaluation of stressed assets in power sector showed that most resolved projects are facing problems in debt servicing due to inadequate cash generation from operations.

"EBITDA (earnings before interest, tax, depreciation and amortization) of many of the resolved projects continues to be low and they may not be able to meet their debt obligations," one of the lenders told ET on condition of anonymity.

"Lack of long-term power purchase agreements, drop in electricity demand pre and post Covid, lack of coal supply arrangements are some of the factors responsible for the low earnings. We are concerned about resolution of remaining assets as these experiences may further lower investment sentiments." Sale attempts of stressed projects like Essar Power Mahan Ltd, Athena Chhattisgarh Power and Jindal India Thermal Power have yielded no results, the sources said.

Another lender said the situation may require policy interventions like continuity of PPAs and existing tariffs. The Uttar Pradesh electricity regulatory commission had earlier sought reduction in tariff from Prayagraj Power Generation Corp plant resolved by State Bank of India-led consortium, saying selling power sector assets by banks at lesser valuation without tariff adjustment will create a "perverse incentive" for buying these assets and create undue "arbitrage". The demand was set aside by Appellate Tribunal for Electricity.

Sustained Economic Recovery in August So Far, says Nomura

Our Bureau

New Delhi: The Indian economy has sustained an increasing pace of recovery through August so far, after a prolonged period of plateauing trends in July, Japanese brokerage Nomura said in a note on Monday.

The Nomura India Business Resumption Index (NBRI) went up to 73.7 for the week ended August 16 from the previous week's reading of 72.5.

This came after the NBRI, a weekly tracker of the pace at

which economic activity normalises, stagnated at the 70 mark for three weeks in July.

While this indicated an improved momentum in August over the moderation in July, the increasing spread of infections continued to hinder recovery.

Nevertheless, the recovery is uneven, and the risk of re-

versal in momentum from a second wave of Covid-19 cases joining a 'rolling wave' in the traditional safer states (in the south and the east) remains high," said the note.

Indicators such as the Google workplace and retail and recreation mobility data resumed an uptrend in August after a prolonged period of flat growth, said Nomura.

However, this was still materially below pre-pandemic levels, it said. There was a steady pickup in the labour participation rate at 42.2%, as against 40.6% in the previous week.

NHAI Nod Soon for 2,000 km of Coastal Road Projects

New Delhi: The national highways building authority will soon approve around 2,000 km of projects worth ₹50,000 crore to improve connectivity in the coastal regions.

"We are now moving forward on widening (four lanes) of roads in the coastal region," a senior official of the National Highways Authority of India (NHAI) told ET, adding that around 2,000 km of projects have been identified. The exercise has been fast-tracked as part of the government's plan to upgrade infrastructure and security along the country's coastline, the official said.

Prime Minister Narendra Modi had said in his Independence Day speech that the government will focus on improving infrastructure connectivity in the coastal regions. "Along with this, our coastline has a very important significance in world trade."

While moving on with port-led development, in the coming days, we will focus on working towards building a modern, state-of-the-art infrastructure towards the construction of four-lane road across the entire coastline," Modi said.

With No Chaat Shops Open, Chickpea Sales Down 35-40%

Pune: Sales of tabul chana have dipped by 35%-40% in the country as people across northern India are not eating their regular dose of 'chana' from office and school canteens, cart vendors, restaurants, and langar, market insiders told ET.

This, however, has helped keep prices of the commodity stable in spite of poor crops in India and some other parts of the world, they said.

Chole bhatura and chole kulcha are among the most popular food dishes in northern India while chana chaat is a popular snack item.
